

Diversified Income Fund

Institutional Class Accumulation and Income Shares

Morningstar Rating™ ★★★★★

FUND DESCRIPTION

The Diversified Income Fund provides efficient access to broad global credit market exposure by investing primarily in a diversified pool of corporate and emerging market fixed income securities of varying maturities. The Fund holds both non-US dollar denominated fixed income securities and non-US dollar currency positions.

POTENTIAL INVESTOR BENEFITS

This Fund offers a potentially higher yielding alternative to core fixed income portfolios and low correlation to US, Japanese and German government interest rates

POTENTIAL FUND ADVANTAGE

The fund benefits from a diversified approach to macroeconomic views on credit trends, interest rates, duration, currencies and curve positioning.

RISKS OF INVESTING

Unit value can go up as well as down and any capital invested in the fund may be at risk. The fund may invest in non-U.S. and non-eurozone securities which involve potentially higher risks including currency fluctuations and political or economic developments. These may be enhanced when investing in emerging markets. Funds that invest in high-yield, lower-rated securities, will generally involve greater volatility and risk to principal than investments in higher-rated securities. The fund may use derivatives for hedging or as part of its investment strategy which may involve certain costs and risks. Portfolios investing in derivatives could lose more than the principal amount invested. For more details on the fund's potential risks, please read the Prospectus and Key Investor Information Document.

ABOUT THE BENCHMARK

The Bloomberg Barclays Global Aggregate Credit ex Emerging Markets (USD Hedged) provides a broad-based measure of the global developed markets investment-grade fixed income markets. The ICE BofA Merrill Lynch BB-B Rated Developed Markets High Yield Constrained Index (USD Hedged) tracks the performance of below investment grade bonds of corporate issuers domiciled in developed market countries rated BB1 through B3, based on an average of Moody's, S&P and Fitch. Qualifying bonds are capitalization-weighted provided the total allocation to an individual issuer (defined by Bloomberg tickers) does not exceed 2%.
